Education

IIIT Senapati Manipur : BTech(CSE)

Semester	1	2	3	4	5
SGPA	8.71	7.9	8.44	8.88	8.87

Senior Secondary Education : Surevin International School(CBSE)

2022 - (94.3/100%)

Secondary Education : Dayawati Modi Public School, Modinagar (CBSE)

2020 - (97.1/100%)

SOP

Thriving to join an organization that can harness my innovative and hardworking nature to generate some innovations for the betterment of society.

Traditional ML Work & Knowledge

- Classification, regression, and clustering, pattern detection, and data segmentation using logistic regression, decision trees, random forests, SVMs, and K-Means clustering.
- Feature engineering, data preprocessing, model selection, and hyperparameter tuning for optimal performance.

Foundational Deep Learning & AI:

- CNNs and RNNs, Image classification, object detection, and NLP, LeNet-5, AlexNet, VGGNet, and ResNet.
- Transfer learning, data augmentation, batch normalization, and dropout, forecasting and sentiment analysis.

Advanced Deep Learning & AI:

- YOLO, Xception, and Transformer.
- Neural machine translation, attention mechanisms, and LLM-based text generation.
- Fine-tuned large models, optimized hyperparameters, and explored generative AI with GPT-4 and Google Gemini for conversational AI and advanced NLP applications.
- FastAPI for API-based deployments, Streamlit, Docker for containerization and Heroku and GCP for deployment.

My Projects

E-Waste Classifier

- Fine-Tuning pre-trained Neural Networks and Computer Vision to classify the images of electronic devices using PyTorch etc.

Real Time Construction Site Monitoring Website and App

- A comprehensive system designed to monitor the number of people on a construction site and estimate machinery activity.
Tools: Yolo, Django.

Gym Website & App

- It is complemented by a cross-platform mobile application that provides all the website's features for on-the-go convenience.
Tools: Flutter, Firebase.

Accident Classifier

- An object detection model designed to identify road accidents and automatically alert nearby hospitals and police stations.
Tools: Raspberry Pi, YOLO.

Skills & Tech Stack

Languages:C/C++ , SQL, Bash, LaTeX, HTML, PHP, JavaScript

Frameworks, Tools & Packages:TensorFlow, Keras, Flask, Django, PyTorch, Transformers, Hugging Face, Git, Pandas, Numpy, Matplotlib, ScikitLearn, NLTK, MongoDB, OpenCV, Flutter, Firebase, Arduino, Docker, MLFlow, GCP, Sagemaker

Courses & Certifications

1. Master Node JS Deno.js, build REST APIs with Node.js
2. PyTorch For Deep Learning Bootcamp

Additional Experience And Awards

Co-Lead, Google Developers Group, IIIT Senapati Manipur

Sep 2024 – Present

General Secretary Technical Board, IIIT Senapati Manipur

Feb 2024 – Nov 2024

- Organized several Competitions, Hackathons, Exhibitions and Ahouba'24 the Annual TechFest at IIIT Senapati Manipur.

Finalist in Smart India Hackathon'23: project idea on Real-Time Monitoring of Construction Sites.

Open Source Contributor to GSSoC and Hacktoberfest

IoT and Embedded Project named Chess Guru for helping and validating using sensors
