Modinagar, Uttar Pradesh - 201204

STATEMENT OF PURPOSE

I am eager to join your organization as its vision and values align closely with my knowledge and skills. I believe that my current expertise, combined with the support and opportunities provided by your organization, can contribute to meaningful innovations and advancements. I am confident that this collaboration will be mutually beneficial, and I am motivated by both the professional growth and the impact I can make.

EDUCATION

• Indian Institute of Information Technology				October 2022 - June 2026			
Bachelor of Technology in Computer Science Engineering				Senapati, Manipur			
Semester	1	2	3	4	5	6	7
SGPA	8.71	7.9	8.44	8.88	8.87	8.55	8.57
• Senior Secondary Education				94.3%			
Surevin International School, Niwari(Uttar Pradesh)				2022			
• Secondary Education				97.1%			
Dayawati Modi Public School, Modinagar(Uttar Pradesh)				2020			

EXPERIENCE

• Smollan India Private Limited				June 2025 - Present			
AI/ML Research Intern							
◦ Applied statistical models and ML techniques to analyze time-series data, build predictive models, and extract actionable insights for decision-making. Researched and implemented Agentic AI systems for autonomous, reasoning-driven agents.							
◦ Fine-tuned LLMs (prompt engineering, evaluation) and optimized traditional ML models (regression, classification) for business use cases. Leveraged SHAP and other XAI methods to decode model behavior.							
◦ Built AI workflows using CrewAI and LangChain, integrating Vector Databases (Chroma DB, FAISS) for semantic search, data scraping, and similarity analysis to enhance retrieval-augmented generation (RAG) pipelines.							
• Saarathi Finance, Mumbai				October 2025 - Present			
SDE Intern							
◦ Engineered a full-stack platform, architecting a scalable Django/DRF backend with 25+ REST API endpoints and developing a cross-platform mobile client using Flutter .							
◦ Implemented Clean Architecture in the Flutter application, structuring data, domain, and presentation layers for maintainability, and managed complex application state using the BLoC pattern for a reactive UI.							
◦ Optimized backend performance through refined ORM queries, advanced filtering, and pagination within Django, while building 7 interactive dashboards and custom admin tools to streamline operations.							
◦ Collaborated in an Agile team environment, utilizing Git for version control and Jira for task management to deliver clean, modular, and scalable features across the entire stack.							
Tech: Django, Django REST Framework, Python, PostgreSQL, Flutter, Dart, BLoC, Git, Jira, Agile Methodologies.							
• SIH - Smart India Hackathon, GSSoC & Hacktoberfest				Sep 2024 - Oct 2024			
Open Source Contributor							
◦ Developed an AI-powered solution for Real-Time Construction Site Management Site, leveraging tech stack, e.g., Python, NLP, Cloud, React. Contributed to 5+ projects in community, e.g., GSSOC'24, Hacktoberfest, related to ML, Computer Vision and Website Development with 20+ successful PRs.							

PROJECTS

• Construction Site Monitoring Portal:							
Tools: React, Django, OpenCV, Tensorflow, Meshroom, Docker							
◦ React frontend with GSAP animations and a Django backend implementing GraphQL APIs. It supports contractor profile management, progress dashboard visualization, and real-time monitoring. For data storage, it uses MongoDB and MySQL, with cookies and sessions for secure logins.							
◦ Automated construction monitoring is achieved using computer vision (OpenCV, Siamese Networks) to analyze site images, identifying construction stages and tracking timelines. 3D site models are generated with Meshroom and Open3D, with interactive visualizations in Three.js. The solution is deployed on GCP using Docker and a CDN, reducing manual site visits and aiding data-driven decision-making.							

• **Farmer App: Advanced version of E-Ganna App**

Tools: Flutter, Express, Tensorflow, GCP, LangChain, MongoDB, MySQL

- Agricultural management application featuring REST API and WebSocket connectivity for real-time data synchronization. The system incorporated comprehensive farmer and crop data management, including payment processing, scheduling, profile authentication, and historical billing records. Integrated TensorFlow-based models for crop disease detection and classification, providing diagnostic results with treatment recommendations.
- Enhanced functionality with a RAG-powered smart chatbot offering home remedy suggestions and facilitating consultations through a geolocation-based appointment system with nearby agricultural offices. The solution combined backend management capabilities with AI-driven decision support for end-to-end farm operations optimization.

• **ML, DL, NLP & CV Projects:**

Tools: Tensorflow, PyTorch, Seaborn, Matplotlib, Pandas, Streamlit, NumPy, LangGraph, YOLO

- Worked on sentiment analysis, NER, chatbots (LangChain, LangGraph, DialogFlow, RAG), and transformer-based applications like resume screening, auto-suggestion, and hate speech detection. Expertise in fine-tuning models like DistilBERT and deploying NLP solutions.
- Experience with image classifiers, object detection (YOLOvX), and CNN architectures (EfficientNet, ResNet). ML experience spans regression, spam classification (SVM, XGBoost), recommender systems, time series forecasting (ARIMA, SARIMA), and GANs for digit generation. LSTM-based sentiment analysis and ViT classifiers demonstrate deep learning proficiency.

SKILLS

- **Programming Languages:** JavaScript, Python, C++, Dart
- **Web & Mobile Technologies:** Flutter, Django
- **Database Systems:** MySQL, PostgreSQL, MongoDB, ChromaDB
- **Data Science & Machine Learning:** Pandas, Numpy, Matplotlib, Scikit-Learn, Tensorflow, PyTorch, NLTK, OpenCV, Polars, LangChain/LangGraph, CrewAI, HuggingFace
- **Cloud Technologies:** Google Cloud Platform
- **MLOps & Version Control:** Github, MLFlow, DagsHub, Docker, Kubernetes, CI/CD Pipelines(Github Actions)
- **Other Tools & Technologies:** Octave, L^AT_EX

VOLUNTEER & LEADERSHIP EXPERIENCE

- **General Secretary, Technical at Gymkhana Council** 02/2024 - 10/2024
Indian Institute of Information Technology Senapati Manipur
 - Headed 6+ clubs of IIIT Manipur and team of 20+ members.
 - Organized 5+ Competitions, Hackathons, Exhibitions and Ahouba'24 the Annual TechFest at IIIT Manipur.
- **Co-Lead**
Google Developers Group, IIIT Senapati Manipur
 - Followed and helped Lead of GDG to manage 5+ GDG on campus events.
- **Event Volunteer**
IIIT Senapati Manipur
 - Coordinated with HoS, to conduct AtmaNirbhar Bharat Workshop

CERTIFICATIONS

- **Udemy:** [PyTorch for Deep Learning Bootcamp](#)
- **Udemy:** [NodeJS - The Complete Guide \(MVC, REST APIs, GraphQL, Deno\)](#)
- **Udemy:** [Deep Learning: Natural Language Processing with Transformers](#)
- **OpenCV University:** [OpenCV Bootcamp](#)
- **NPTEL:** [Digital Image Processing](#)
- **Pregrad:** [Artificial Intelligence with ML\(AIML\)](#)

ADDITIONAL INFORMATION

Languages: Korean (Academic Course), Hindi (Native), English (Professional), Sanskrit (Academic Course)

Interest: Football

Typing Speed: 62+ wpm

Exame Qualified: GATE'25 Computer Science-Information Technology and Data Science Artificial Intelligence
